

FastFill® 220

The FastFill® 220 is one of the fastest store-level robotic instruments at 200+ filled and labeled prescriptions per hour. Add Efficiency WorkPath® workflow software for a comprehensive operating efficiency solution.

High technology for high performance— maximize prescription volume without remodeling

Accurately automates up to 60% of countable prescription medications

Faster than any comparable pharmacy robotic system at 200+ prescriptions per hour. Speeds prescription fulfillment with 220 factory-calibrated canisters – 99.99% dispensing accuracy.

Enhance safety with direct dispensing

The FastFill 220 is a direct fill system, which means that each medication is dispensed from its own location. This eliminates the risk of cross contamination, since there is no central chute.

Maximize precious pharmacy space

Compact footprint is almost identical to one row of traditional aisle shelving, making it easy to boost productivity without expensive or disruptive remodeling. Simple to install: no special wiring, power or air is required and set-up is done in a matter of hours.

Speed, safety, simplicity

Ergonomic design streamlines your pharmacy's operation. Smart tags ensure canisters only dispense from their appropriate locations. Random-load vial bins save time during refilling. FastFill 220 continues operation while canisters and vial bins are replenished. Barcode-driven replenishment ensures accuracy.

Efficiency WorkPath (optional) enhances safety

Decreases the likelihood of medication errors with image and barcode scan verification. The software integrates with your Pharmacy Information System and manages the fulfillment of all orders, whether filled by automation or manually.

The Best Medicine for Healthcare™

FastFill® 220

The FastFill 220 is one of the fastest store-level robotic devices at 200+ filled and labeled prescriptions per hour

Rx Volume

- For pharmacies averaging 400-1,000+ prescriptions per 10-hour shift; accommodates even greater peak volumes
- Automates up to 60% of countable prescriptions

Processing Speed

- 200+ filled, labeled prescriptions per hour

Components

- FastFill 220 direct-fill robotic dispensing system
- 220 factory-calibrated canisters
- Microsoft Windows® 2003 server with monitor and hub
- Microsoft Windows XP client computer with touch screen monitor
- AMS software
- UPS for server, client and FastFill 220
- Onboard label printer
- Barcode scanner
- Biometric scanner

Options

- Efficiency WorkPath dispensing workflow software
- StockFlow® shelving for replenishment/work station

Specifications

Oral Solid Canisters:

650 cc; 99.99% dispensing accuracy

Vial Size: 20, 40 dram

Software: Windows XP

Interfaces: File transfer, HL7 messaging or ODBC transferred via diskette, on-line serial or network communications and TCP/IP messaging

Dimensions

2'5" W x 8'5" L x 6'6" H

Footprint/Weight: 1,600 lbs.

Power Requirements: Standard power source, 115v, 60Hz, 10 amps

StockFlow Shelving System (Optional)

StockFlow shelving gives you more efficient storage capacity and work area in less space.

Recommended

Two 1-bay units of FastFill Replenishment/Work Station (SF350X00)

Efficiency WorkPath (Optional)

For maximum safety, accuracy and process improvement, the FastFill 220 can be integrated with Efficiency WorkPath, a complete dispensing workflow management system. It streamlines the fulfillment process of both automated and manually picked orders throughout the entire pharmacy. This decreases the likelihood of medication errors, maximizes pharmacy productivity and enables barcoding on all dosage forms.

Interfaces

HL7 and TCP/IP messaging over network communications

Power Requirements: 110V, 60Hz, 15 amps

Options: Custom labels, additional workstations, Image Capture Station
