

FastPak® 71

Automated Oral Solid Packaging and Barcoding System

Compliance packaging at its best in the smallest footprint available today.

An RxWorks™ Suite Solution

The FastPak® 71 is one of many RxWorks Suite technology and consulting solutions designed to successfully enable barcode medication administration and verification at the patient bedside.

The ability to dispense unit dose and multi-dose packaging for oral solid medications improves patient compliance, reduces errors, minimizes waste and saves time and labor.

The compliance packets contain up to six different medications and can be barcoded for accurate patient distribution. Fully automated production provides greater efficiency for multiple task and device operation.

There are 71 location-specific canisters that dispense oral solid medications quickly and accurately. A Universal tray accommodates unique/exception dosing and special packaging, and a prefill tray permits staging of medications for later release into the Universal tray. Other additional benefits include:

- Convenient pull-out drawers provide for simpler maintenance and easy access to canisters, paper and ribbon.
- Optional Replenishment Kit facilitates fast, accurate inventory control and canister replenishment with easy-to-use counting scale and barcode scanner.

Models:

FastPak 71
Both unit dose and multi-dose packages
FastPak 71 Narrow
Only narrow unit dose packages

Universal Tray:

For exception medications

Packaging Speed:

Up to 40 packages per minute

Cart

The Best Medicine for Healthcare™

FastPak[®] 71

Automated Oral Solid Packaging and Barcoding System

Barcoded medications
ready for bedside verification.

Additional Product Highlights:

- Easy-to-use software features a touch screen and on-screen video help.
- Up to eight canisters can be dedicated to one drug.
- Canisters are compatible with AmerisourceBergen's FastFill[®] and QuickFill[®] Systems.
- Includes cabinet stand for convenient storage of disposables.
- Stand-alone operation, or can interface with other AmerisourceBergen systems.
- Enhances safety when combined with ClinicWorks (optional). ClinicWorks improves workflow and decreases the likelihood of pharmacy dispensing errors with barcode scan verification. Integrates with your Pharmacy Information System.
