***Good Neighbor Pharmacy® and InSite Extranet Wins Best in Class Award
MicroStrategy Award for Retail Pharmacy Extranet and Dashboard***

VALLEY FORGE, Pa. (January 27, 2010) – Good Neighbor Pharmacy and AmerisourceBergen are being recognized by MicroStrategy for a recent extranet deployment considered ‘best in class’. The InSite system, powered by MicroStrategy, is a business intelligence application developed for retail pharmacies. Within the InSite system are dashboards which provide analytics and personalized information to help the pharmacies improve business practices.

The extranet site, InSite, received a best in class award for extranet deployments at the MicroStrategy World 2010 conference earlier today. The extranet site competed against customer-facing and supplier-facing applications launched this year by other organizations. Good Neighbor Pharmacy also received a second award from MicroStrategy based on the dashboard’s business value and look for the end user – the retail pharmacy owner.

“The management team and our Good Neighbor Pharmacy customers have worked diligently on developing this extranet site which will allow pharmacy owners to uncover opportunities to expand their business, reduce unnecessary costs, help with reimbursement strategies and identify and attract patients with critical needs,” said Chuck Reed, GVP, Business Management - Retail Sales and Marketing, AmerisourceBergen. “We are honored to be recognized for the deployment of this comprehensive system and its powerful dashboards.”

--more --

The InSite system also allows customers to compare their performance against peer-group pharmacies, and optimize their interactions with patients. InSite supports several of the Good Neighbor Pharmacy programs, including business coaching, front-end solutions and patient care services.
